

“ERACLEA” Bench with wood

Sheet code:

PAAR065

Drawing code:

Designer:

Arch. Matteo Ceschini

Revision:

02_01/10/2015

Product:

Linear bench model “ERACLEA”, composed by a light, supporting base arranged to lodge wooden slats that offer a comfortable seat at both high and low temperatures.

Dimensions:

length: 2200 mm;
width: 610 mm;
height: 450 mm;
total weight: 500 kg.

Material:

The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate. The seat is composed by 10 wooden slats offered with two different types of essence: movingui or pine. All slats have a section of 55x35 mm, except for the head ones that have a section of 53x120 mm. Slats are fastened to the seat through screws and three stainless steel plates, arranged to ease the water discharge under the slats.

Reinforcing:

The bench is reinforced with bushes and a double electric welded frame.

Finishing:

All surfaces are sandblasted, except for the upper rim that can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All wooden elements in movingui and pine can be impregnated and painted with a protective varnish, or treated, upon request, with an ultra-resistant coating, like “Sikkens”. All edges are rounded or made blunt.

Handling:

Use appropriate equipment when handling.

Installation:

Simply place on the flooring.
