Additional Notes to Bellitalia Pricing

Custom RAL color - 5%

FSC Wood – 20%

All products in grey concrete, white granite, and marble stones aggregate are painted with protective anti-decay coatings.

The metal band for planters and bollards can be supplied in stainless steel or copper, for the same price.

The steel used for all furniture accessories is always galvanized and painted, except for the planter containment tanks, for the tree grid containment frames, and for the planter pole holders, which are galvanized only.

If not differently showed, the stainless steel used is the 304L with an electropolishing treatment included.

All Pine and Okume woods are impregnated and coated.

All litter bins are equipped with a bag-holder.

All furniture components in steel are treated with thermosetting powder coating RAL 7021, while components in cast iron are painted in charcoal grey.

Slight variations in color and finishing, for example, micro-cracking, different shades on surfaces, or rising of oxides, are natural phenomena related to the products' manufacturing and maturing processes. The color shown in the samples is approximate, and different shades of color shall not be intended as nonconformity of the product. Bellitalia will not accept claims or demands for damages related to color variations, as they belong to the material's characteristics and depend on environmental conditions during the manufacturing and maturing processes.
