

“TIMELESS 820” Planter

Sheet code: **FICL004**

Drawing code: **AF16010203**

Revision: **23/01/2019**

Designer:
Bellitalia Design Department

Product: Circular planter model “TIMELESS 820”, composed by a base, two upper elements and a central band in between. The planter is equipped with a **levelling system** and a **water reserve system** to guarantee the soil the proper humidity level, avoiding the dispersion of internal water.

Dimensions: diameter: 820 mm;
height: 590 mm;
total weight: 408 kg;
capacity: 115,7 litres.

Material: The planter can be manufactured using reconstituted natural marble stones, white granite or grey concrete conglomerate. Copper or stainless steel central band.

Reinforcing: The planter’s two upper elements are reinforced and fitted with bushes that permit their fastening through a stirrup, used also for their lifting and handling. The base is also reinforced and endowed with thread bars that permit its levelling.

Finishing: The planter’s surfaces can be polished, to give the product a shiny effect, otherwise sandblasted or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. The copper band is painted with a protective coating for a durable shiny appearance, while the stainless steel band undergoes a satin finish treatment. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: The structure is delivered already assembled. Simply place the base on the flooring, and level the upper element by adjusting the levelling system’s lower screws.
