

“ERACLEA WS” Bench

Sheet code: **PAAR068**

Drawing code:

Revision:

10/01/2019

Designer:

Arch. Matteo Ceschini

Product:

Linear bench model “ERACLEA WS”, composed by a light, supporting base arranged to lodge wooden slats that offer a comfortable seat at both high and low temperatures. A complete backrest is fastened to the seat.

Dimensions:

length: 2200 mm;
width: 610 mm;
height: 784 mm;
total weight: 508 kg.

Material:

The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate. The covering is composed by 10+4 wooden slats offered with three different types of essence: pine, okumè or exotic wood (please see respective material sheet). All slats have a section of 55x35 mm, except for the head ones that have a section of 53x120 mm. Slats are fastened to the seat through screws and three stainless steel plates, arranged to ease the water discharge under the slats.

Reinforcing:

The bench is reinforced with bushes and a double electric welded frame.

Finishing:

All bench’s surfaces are sandblasted, except for the upper rim that can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. All wooden elements in pine and okumè can be impregnated and painted with a protective varnish, the exotic wood is impregnated and, upon request, varnished. All edges are rounded or made blunt.

Handling:

Use appropriate equipment when handling.

Installation:

Simply place on the flooring.
