Product: Monolithic bollard with circular section model “IKI”, composed by a base and an eyebolt for its handling.

Dimensions: diameter: 430 mm;
height: 1000 mm;
total weight: 300 kg.

Material: The base can be manufactured using reconstituted natural marble stones, white granite or grey concrete conglomerate, while the eyebolt is in steel.

Reinforcing: The base is reinforced and fitted with bushes that permit the eyebolt’s fastening.

Finishing: All visible concrete surfaces are completely sandblasted and then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. The eyebolt is treated by a hot dip galvanisation. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: Simply place on the flooring.
