

## “LIDO 4500” Bench

**Sheet Code:** PAAR134

*Drawing code*

*Revision:* 14/01/2019

**Designer:**  
C+S Architects

**Product:** Modular bench having round section “LIDO 4500” made of six curved ashlar combined.  
It is possible for the customer to match the bench with a custom-made base, able to grant a perfect flatness also by means of a covering cap that plugs the space for greenery. There is also the possibility to add LED strips.

**Dimensions:** diameter: 4500 mm;  
height: 1440 mm;  
height with base: 412 mm;  
total weight with base: 8700 kg;

**Material:** the bench can be manufactured using reconstituted natural marble stones or white granite conglomerate.

**Reinforcing:** In this case, every circular section is reinforced and endowed with bushes that permit its lifting.

**Finishing:** All surfaces are sandblasted, except for the top seat surface that can be polished, to give the product a shiny effect. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. All edges are rounded or made blunt.

**Handling:** Handle the product by using appropriate equipment and the bushes provided. Ashlars can be moved by using a system specifically designed for their handling.

**Installation:** place the first ashlar on the floor in position, move the second ashlar in position using the steel brackets to ensure solid fixing. Continue in the same way with successive ashlars, with particular attention to the juxtaposition of the last one that closes the geometry.
