

## “INTERSECTION” Ashtray

**Sheet code:** POAR003

**Drawing code:**

**Revision:** 15/12/2018

**Designer:**

Meneghello Paoletti associati

**Product:** Ashtray model “INTERSECTION”, composed by a concrete monolithic element integrated with a vertical steel element equipped with a micro-perforated metal plate to facilitate the cigarettes switching off.

**Dimensions:** length: 121 mm;  
width: 176 mm;  
height: 1030 mm;  
total weight: 28 kg;

**Material:** The base can be manufactured using reconstituted natural marble stones, white granite or grey concrete conglomerate. The ashtray is made of stainless steel.

**Reinforcing:** The ashtray is reinforced and fitted with bushes that permit its handling and ground fixing. The bush on the installation surface allows anchoring to the ground through a threaded bar treated with chemical.

**Finishing:** The base surface is sandblasted and covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. All metal parts can be treated by a hot dip galvanisation if in steel, and coloured RAL7021, or can undergo a satin finish treatment if in stainless steel. All edges are rounded or made blunt.

**Handling:** Use appropriate equipment when handling.

**Installation:** Drill a hole in the flooring, and fix the threaded bar to the base of the element; fill the hole with bi-component chemical anchoring and place the product immediately, paying attention to the hole centering.
