

LITTER BINS

Cestino per la raccolta differenziata con struttura saldata in lamiera di acciaio su cui è fissato un coperchio a tre fori in lamiera di alluminio. All'interno del cestino sono presenti tre contenitori interni da 60 litri ciascuno in lamiera di acciaio.

Il coperchio e il mantello sono forniti con apposite grafiche adesive relative a colore e tipologia di rifiuto da conferire. Tutte le parti metalliche sono zincate e verniciate a polvere poliestere termoindurente.

Tutta la viteria è in acciaio inox AISI304.

Installazione in appoggio con piedini regolabili per il livellamento (solo indoor).

Litter bin with a welded steel sheet structure to which a three-hole aluminium sheet lid is installed.

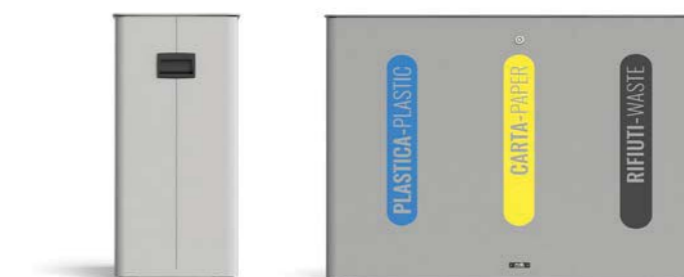

The litter bin is equipped with three 60-litre inner liners each made of steel sheet for separate waste collection.

The lid and mantle are supplied with special adhesive graphics relating to the colour and type of waste.

All metal parts are galvanised and coated with thermosetting polyester powder.

All fixings are in AISI304 stainless steel.

Free-standing installation with adjustable feet for levelling (indoor only).

MILANO

Corbeille avec une structure en tôle d'acier soudée à laquelle est fixé un couvercle en tôle d'aluminium à trois trous pour les tri-sélectif des déchets. A l'intérieur de la corbeille se trouvent trois conteneurs intérieurs de 60 litres chacun en tôle d'acier.

Le couvercle et le manteau sont fournis avec des graphiques adhésifs spéciaux correspondant à la couleur et au type de déchets à livrer.

Toutes les parties métalliques sont galvanisées et thermolaquées en poudre de polyester thermodurcissable. Toute la visserie est en acier inoxydable AISI304.

A poser avec pieds réglables pour la mise à niveau (installation à l'intérieur uniquement).

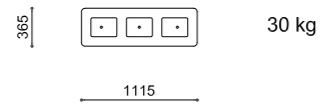

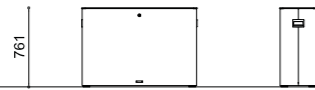

Papelera con estructura de chapa de acero soldada a la que se fija una tapa de chapa de aluminio de tres agujeros para la recogida selectiva de residuos. Dentro de la papelera hay tres contenedores internos de 60 litros fabricados en chapa de acero.

La tapa y el manto se suministran con gráficos adhesivos especiales relacionados con el color y el tipo de residuos. Todas las piezas metálicas están galvanizadas y pintadas con polvo de poliéster termo-endurecido.

Todos los herrajes son de acero inoxidable AISI304.

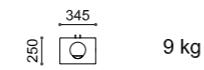

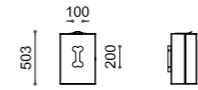

Instalación en apoyo con pies ajustables para nivelación (sólo en interiores).
