

Max Dimensions:

Height: 450 mm | Length: 2300 mm | Width: 627,5 mm

**Description:**

The bench FREEDOM consists of a strong structure in steel EN10111DD1, thickness 50/10, cold galvanized and polyester powder coated. Such structure consists of two vertical planks, on which a V-shaped plate and a plate with 4 holes (12 mm diameter) for the fixing to the ground are welded. 11 exotic wood bars, which are treated with natural waterproof oils, are fixed to the structure in steel (dimensions 60x40 mm, length 2300 mm). On the bottom of the seat, two cold galvanized and polyester powder coated steel brackets (thickness 50/10) are applied to keep the wood bars together.
