SINGLE STEEL

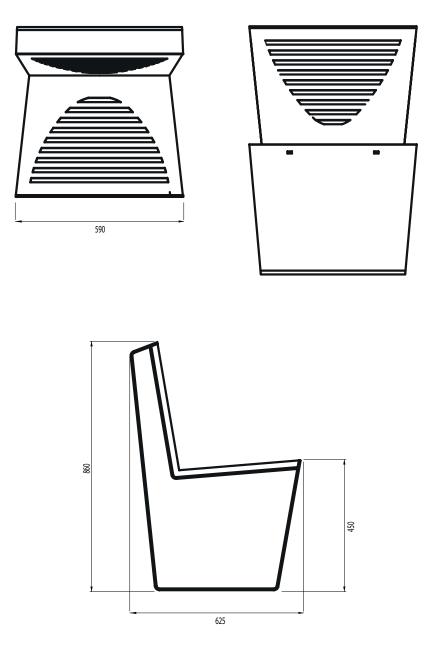

SINGLE STEEL

Chair

Max Dimensions:

Height with backrest: 860 mm | Length: 590 mm | Width: 625 mm

Description

The chair SINGLE (A) is entirely made in steel of 60/10 thickness. It is the result of 2 steel sheets, bent and joined together through a continuous welding. The backrest and the seat have variable rectangular geometric figures. On the base of the chair there are 4 holes (11 mm diam.) for the fixing to the ground through specific bolts (not provided). For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.
