LITTER BIN

The litter bin EIGHT is available in two variants: the first one has a door made completely of steel, which can be customised with any types of logo by laser cutting, the second variety has a steel door and a wooden panel, a multilayer Okumè panel treated with natural waterproof oils.

On the upper part of the supporting structure is housed an ashtray made by molding a sheet steel,

th.10/10, to which is welded a network of holes D. 5 mm useful to put out the cigarettes.

Emptying the container is done by a release through a bayonet locking system.

On the bottom of the litter bin there are 4 holes $\varnothing 10$ mm, for ground fixture with appropriate bolts (not supplied).
