

Max Dimensions:

Height: 500 mm | Width: 500 mm | Length: 500 mm

**Description:**

The LEAVES planter, in a square shape, is constructed in galvanised and polyester powder coated steel or Corten treated with an oxidation cycle, thickness 20/10. There are some leaf-shaped drawings on the two sides of the planter. The ground fixing is possible thanks to four M10 holes and their appropriate bolts.
