Max dimensions:

Height with backrest: 823,16 mm | Height seat: 380 mm | Width: 588,14 mm
Length: 1350 mm | Weight: 53 kg

**Description:**

This Morphscape lounge includes a back rest that envelops you in the 3D pattern. The interplay of solid and laser cut areas makes the form weightless while the precise angles and edges give heft and definition. With a low front and suspended seat, the bench creates a structural impact and illusion of form. The sofa Morphscape Lounge is made of 3 elements in steel EN10111DD1, with 30/10 and 50/10 thickness, treated with electrogalvanizing and polyester powder coated with AkzoNobel Ral colours at choice. Every element can have a different colour in order to have a varied range of options. This element of the sofa is the main element of the Morphscape Lounge, but can be used on its own as well. It is made of a steel sheet, which is laser-cut, bent and welded. The structure is made of a sheet, 30/10 thickness, with the typical Kaleidoscope carving, shaping the seat and the backrest. The two elements on the side, 50/10 thickness, are welded to the structure. On the lower part there are 2 plates, with 2 holes (11 mm diam.) For the fixing to the ground through specific bolts (not provided).

For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cathodolysis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

Max dimensions:

Height: 823,16 mm | Height seat: 380 mm | Width: 588,14 mm

Length: 588,14 mm | Weight: 39 kg

**Description:**

The side element of the Morphscape Lounge sofa. In the standard version there are 2 side modules that are placed next to the main module in the middle. It is made in a steel sheet, which is laser-cut, bent and welded. The structure is made of a sheet, 30/10 thickness, with the typical Kaleidoscope carving, shaping the seat and the angular backrest. The load-bearing structure is made in steel sheet, 50/10 thickness. On the lower part there are 3 plates, with 2 holes (11 mm diam.) For the fixing to the ground through specific bolts (not provided). For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cathodolysis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.
