Max dimensions:

Height: 730 mm | Width: 755 mm | Length: 1500 mm

Weight: 66 kg

**Description:**

The Sinuous lounge features soft curves, softened further by a pattern of sinuous lines. Slatted laser cut elements let scenery and light show through this sensual bench. Sinuous Lounge is made in steel sheet. The structure is made of a steel sheet, 30/10 thickness, with the typical Lines carving shaping the seat and the backrest. The two elements on the side (50/10 thickness) are welded to the seat. On the lower part there are 2 plates, with 2 holes (11 mm diam.) For the fixing to the ground through specific bolts (not provided). For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cathoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.
